

Fernando Gelin

Head of AI Products, MarianaTek

San Francisco, CA | fernando@fernandogelin.com | www.linkedin.com/in/fernando-gelin-b4a009289/ | github.com/fernandogelin

Engineering and product leader with a strong hands-on foundation in software architecture, team development, and AI. Experienced in translating complex problems into practical products, setting technical direction, and leading teams from exploration through production.

Experience

Head of AI Products, MarianaTek | Xplor Technologies

Apr 2026 - Present | Remote

- Build and deploy MarianaTek's MCP connector, in-product AI features, and customer-facing agentic messaging, owning implementation through production deployment
- Set AI strategy and roadmap across customer-facing products and the internal platform
- Define the strategy and process for agentic development across the software lifecycle, creating reusable AI agent skills for spec-driven development and collaboration among engineers, product managers, and designers

Senior Engineering Manager | Frontend Software Architect – MarianaTek | Xplor Technologies

Aug 2023 - Mar 2026 | Remote

- Led a team of 9 full-stack engineers building scalable web applications for boutique fitness studios, delivering seamless experiences across scheduling, payments, and client management
- Drove frontend architecture strategy including microfrontend adoption, enabling independent team deployments and faster iteration cycles

Senior Frontend Engineer – MarianaTek | Xplor Technologies

Jan 2021 - Jul 2023 | Remote

- Upgraded the legacy Ember.js application to newer versions and built features in React-based applications
- Started the company's Web Components-based design system and integrated it into the Ember.js application

Senior Research Software Engineer – Center for Computation and Visualization | Brown University

Oct 2019 - Jan 2021 | Providence, RI

- Built, deployed, and maintained research web applications for scientists and students, from one-off tools to distributed systems used by thousands of students
- Mentored undergraduate interns and graduate students in version control, testing, and collaborative software development
- Developed Honeycomb, an open-source framework for real-time psychophysiological data collection, supporting NIH BRAIN Initiative research

Research Software Engineer – Center for Computation and Visualization | Brown University

Apr 2018 - Oct 2019 | Providence, RI

- Worked in the Data Science Practice and then the new Center for Computation and Visualization, collaborating with the Brown Center for Biomedical Informatics and Computational Biology Core on research software for data management, analysis, and visualization

Data Science Associate – Data Science Practice | Brown University

Nov 2016 - Apr 2018 | Providence, RI

- Analyzed and visualized data with the Rhode Island Innovative Policy Lab to help researchers design and test data-informed policy

Senior Research Fellow – UW Medicine Department of Psychiatry | University of Washington

May 2014 - Jun 2016

- Analyzed human genome sequences using GATK, Picard, and BWA
- Built Python and shell pipelines for demultiplexing, alignment, coverage analysis, and variant calling of targeted sequencing data
- Built an Ember.js application for lab use that generated molecular inversion probe protocols and calculated reagent amounts

Education

Ph.D. Ecology & Evolutionary Biology | University of Vermont | May 2014

M.Sc. Animal Biology | São Paulo State University | May 2009

B.S. Biology | São Paulo State University | Dec 2006

Certification

Certificate Biotechnology Project Management | University of California San Diego / University of Washington | Dec 2015

Selected Publications

Long-term ecological assessment of intracranial electrophysiology synchronized to behavioral markers in obsessive-compulsive disorder | *Nature Medicine*, 2021

Honeycomb: a template for reproducible psychophysiological tasks for clinic, laboratory, and home use | *Brazilian Journal of Psychiatry*, 2022

Identifying Herbal Adverse Events From Spontaneous Reporting Systems Using Taxonomic Name Resolution Approach | *Evolutionary Bioinformatics*, 2020

Expertise

AI & platforms: AI product development, Conversational experiences, Agentic workflows, Platform architecture

Scientific computing: Bioinformatics, Genomic data analysis, Data processing pipelines, Scientific visualization

Software engineering: Software architecture, Web application development, Systems integration, Performance optimization

Leadership: Engineering management, Product strategy, Technical roadmapping, Cross-functional collaboration, Mentorship
